

# Distinguishing between the Varieties of Arabic: Dialect Identification is neither Solved nor the Solution

Amr Keleg

PhD Student at the University of Edinburgh  
Under the Supervision of: Walid Magdy, Sharon Goldwater

CAMeL

31 October 2024

Institute for Language,  
Cognition and Computation

THE UNIVERSITY of EDINBURGH  
**informatics**

## 1 Dialect Identification is not solved,

-  **Arabic Dialect Identification under Scrutiny: Limitations of Single-label Classification** (Keleg & Magdy, ArabicNLP-WS 2023)
-  **NADI 2024: The Fifth Nuanced Arabic Dialect Identification Shared Task** (Abdul-Mageed et al., ArabicNLP-WS 2024)

## 2 ... nor the solution (Spoiler: Arabic Level of Dialecttness)

-  **ALDi: Quantifying the Arabic Level of Dialecttness of Text** (Keleg et al., EMNLP 2023)
-  **Estimating the Level of Dialecttness Predicts Inter-annotator Agreement in Multi-dialect Arabic Datasets** (Keleg et al., ACL 2024) - **Outstanding Paper Award - ACL 2024**

# Why distinguish between varieties of Arabic?

## Raw Pretraining corpus

Sentence
أمطار خفيفة على منطقة مكة المكرمة
...
طيب مافي حلقات زيادة؟ ما شبعنا والله

# Why distinguish between varieties of Arabic?

Raw Pretraining corpus

Sentence
أمطار خفيفة على منطقة مكة المكرمة
...
طيب مافي حلقات زيادة؟ ما شبعنا والله

a) Representation of dialects?

# Why distinguish between varieties of Arabic?

Raw Pretraining corpus

Sentence
أمطار خفيفة على منطقة مكة المكرمة
...
طيب مافي حلقات زيادة؟ ما شبعنا والله

Dataset of Tweets

Tweet	Label
*** هذا رجال	OFF
...	...
الراجل بسطنا	NOT

a) Representation of dialects?

# Why distinguish between varieties of Arabic?

Raw Pretraining corpus

Sentence
أمطار خفيفة على منطقة مكة المكرمة
...
طيب مافي حلقات زيادة؟ ما شبعنا والله

Dataset of Tweets

Tweet	Label
*** هذا رجال	 OFF
...	...
الراجل بسطنا	 NOT

a) Representation of dialects?

For Annotation:  
b) Routing samples.

For Modeling:  
c) per-variety performance?

# Can Dialect Identification help?

الزلمة أسعدنا

الراجل أسعدنا

أسعدنا الرجل

الرِّجَال أسعدنا

الزول أسعدنا

# Can Dialect Identification help?

الزلمة أسعدنا

الراجل أسعدنا

أسعدنا الرجل

الرِّجَال أسعدنا

الزول أسعدنا

**Goal:** Automatically identify **A DIALECT** for each sentence.

**Status:** quite popular among the Arabic NLP community ★

# Level of granularity #1

## MSA (Fus-ha)

- shared across countries

## Regional dialects

---

Alsarsour, Israa et al. 2018. "DART: A Large Dataset of Dialectal Arabic Tweets."

Baimukan, Nurpeiis, Bouamor, Houda, and Habash, Nizar. 2022. "Hierarchical Aggregation of Dialectal Data for Arabic Dialect Identification."

# Level of granularity #2

## MSA (Fus-ha)

- shared across countries

## Country-level dialects

- generally targeting at least 18 labels

# Investigation of country-level single-label DI

 **Arabic Dialect Identification under Scrutiny:  
Limitations of Single-label Classification** (Keleg &  
Magdy, ArabicNLP-WS 2023)

- Speakers from 7 countries validated 490 errors.
- Only **33%** of validated mispredictions are **true errors!**
  - i.e., 67% of them are multi-dialect samples.
-  Inaccurate Evaluation!
-  How common are these samples?

# Building the **First** Multilabel ADI Dataset (NADI 2024)

 **NADI 2024: The Fifth Nuanced Arabic Dialect  
Identification Shared Task** (Abdul-Mageed et al.,  
ArabicNLP 2024)

# Guidelines + Shared Task Summary

Is it possible that the tweet is authored by someone who speaks one of your country's dialects?

- 1,120 sentences.
- 3 annotators from 9 different countries (total of 27)

# Guidelines + Shared Task Summary

Is it possible that the tweet is authored by someone who speaks one of your country's dialects?

- 1,120 sentences.
- 3 annotators from 9 different countries (total of 27)

Sentence	Valid in
وين يلعب هذا ما شفته	Algeria  , Palestine  , Yemen 

# Guidelines + Shared Task Summary

Is it possible that the tweet is authored by someone who speaks one of your country's dialects?

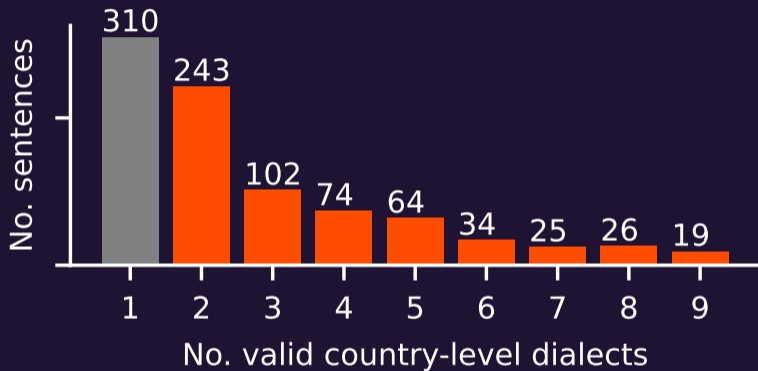

- 1,120 sentences.
- 3 annotators from 9 different countries (total of 27)

Sentence	Valid in
وين يلعب هذا ما شفته	Algeria  , Palestine  , Yemen 

- F1-score<sub>macro</sub> 50.57±7.1 (Still not solved).
- **Being hosted as a public leaderboard.**

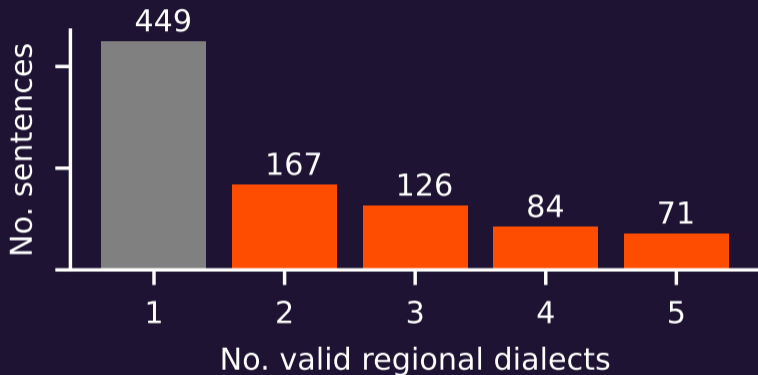

# Multilabel samples in NADI 2024?

All samples but 310 are multi-dialect (country level).

# Multilabel samples in NADI 2024?

> 50% of samples are valid in multiple regions.

Not just because of within-region similarities!

# Dialect Identification is not the Solution

 **ALDi: Quantifying the Arabic Level of Dialectness of Text**  
(Keleg et al., EMNLP 2023)

 **Estimating the Level of Dialectness Predicts Inter-annotator Agreement in Multi-dialect Arabic Datasets**  
(Keleg et al., ACL 2024) - **Outstanding Paper Award - ACL 2024**

# Different ways of saying: I'm happy 😊

أنا فَرِحَ  
farih ?na

أنا مبسوط  
mbsoT ?na

أنا مشيِّص  
mʃhys ?na

Arabic  
Level of  
Dialectness  
(ALDi)

EMNLP 2023

# Different ways of saying: I'm happy 😊

**MSA root meaning**

to be happy

Arabic  
Level of  
Dialectness  
(ALDi)

EMNLP 2023

- **ALDi**: Divergence from Standard Arabic (MSA).
- Continuous score in  $[0, 1]$ .
- Sentence-like level

# Sentence-ALDi model

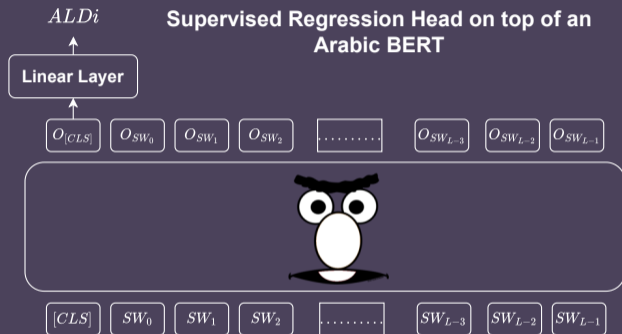

# Sentence-ALDi model

RMSE(test set) = 0.18

# Sentence-ALDi model

RMSE(test set) = 0.18

Dialect-agnostic

# Applications of ALDi

- 1 Studying Intraspeaker Variation (Presidential Speeches)

## 2) Annotating Multi-Dialect Arabic Datasets

**Common Practice:** 🎲 randomly assign to Arabic speakers

☢️☢️☢️ **Annotator's dialect  $\neq$  Sample's dialect** ☢️☢️☢️

📎 More strict annotating Hate Speech 🗑️🗑️🗑️  
(Bergman and Diab, 2022)

📎 Less accurate identifying Sarcasm 🤪  
(Abu Farha and Magdy, 2022)

Bergman, A. and Diab, Mona. ACL (findings) 2022. "Towards Responsible Natural Language Annotation for the Varieties of Arabic."

Abu Farha, Ibrahim and Magdy, Walid. WANLP 2022. "The Effect of Arabic Dialect Familiarity on Data Annotation."

# Annotation Codebook (v1.0)

 **Step 1:** Identify the dialect of each sample

 **Step 2:** Route the sample to speakers of its dialect

# Annotation Codebook (v1.0)

 **Step 1:** Identify the dialect of each sample

 **Step 2:** Route the sample to speakers of its dialect

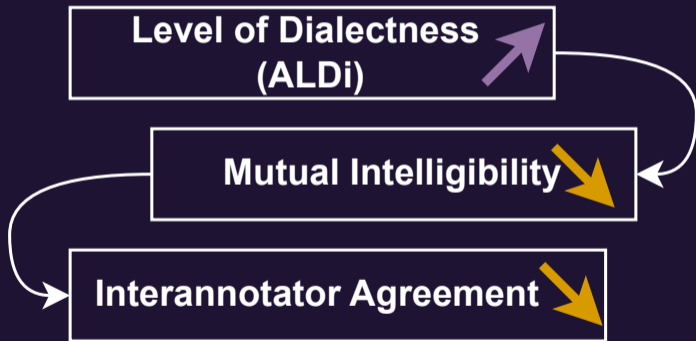

**Hard to crowdsource speakers of some dialects**  
**(i.e., Limited resource   )**  
(Mubarak and Darwish, 2016)

Should some dialectal samples be prioritized?

# Intuition

# Analysis

 15 public datasets covering 6 Tasks:  
Hatespeech, Sentiment Analysis, Dialect Identification, ...

- (1) sentence-level classification datasets
- (2) multi-dialect samples
- (3) samples randomly assigned to annotators**
- (4) individual annotator labels**

## Methodology:

- 1 Estimate ALDi of samples.
- 2 Bin samples.
- 3  $P_{\text{bin}}(\text{Full Agreement})$

$$P_{\text{bin}}(\text{Full Agreement}) \approx \frac{N_{(\text{bin})} \text{ Full Agreement}}{N_{(\text{bin})} \text{ Total Samples}}$$

## Methodology:

- 1 Estimate ALDi of samples.
- 2 Bin samples.
- 3  $P_{\text{bin}}(\text{Full Agreement})$

$$P_{\text{bin}}(\text{Full Agreement}) \approx \frac{N_{(\text{bin})} \text{ Full Agreement}}{N_{(\text{bin})} \text{ Total Samples}}$$

## Methodology:

- 1 Estimate ALDi of samples.
- 2 Bin samples.
- 3  $P_{\text{bin}}(\text{Full Agreement})$

$$P_{\text{bin}}(\text{Full Agreement}) \approx \frac{N_{(\text{bin})} \text{ Full Agreement}}{N_{(\text{bin})} \text{ Total Samples}}$$

## Methodology:

- 1 Estimate ALDi of samples.
- 2 Bin samples.
- 3  $P_{\text{bin}}(\text{Full Agreement})$

$$P_{\text{bin}}(\text{Full Agreement}) \approx \frac{N_{(\text{bin})} \text{ Full Agreement}}{N_{(\text{bin})} \text{ Total Samples}}$$

## Methodology:

- 1 Estimate ALDi of samples.
- 2 Bin samples.
- 3  $P_{\text{bin}}(\text{Full Agreement})$

$$P_{\text{bin}}(\text{Full Agreement}) \approx \frac{N_{(\text{bin})} \text{ Full Agreement}}{N_{(\text{bin})} \text{ Total Samples}}$$

Finding (1) - For 8 of 12 **non Dialect Identification** datasets

ALDi

Interannotator Agreement

with significant strong negative  $\rho < -0.7$

# Annotation Codebook (v1.1)

Prioritize routing high-ALDi samples to speakers of the samples' respective dialects, (Finding 1)

for which Dialect Identification is more accurate. (Finding 2)

# Collecting ALDi Annotations

# 1) AOC Dataset

## Arabic Online Commentary Dataset (Zaidan et. al, 2011)

Comments to news articles

127,835 sentences (3  annotations each)

Popular Dialect Identification (DI) labels.

# 1) AOC Dataset

## Arabic Online Commentary Dataset (Zaidan et. al, 2011)

Comments to news articles

127,835 sentences (3  annotations each)

Popular Dialect Identification (DI) labels.

Ignored *Discrete* Level of Dialectness labels!

Tell us how much dialect (عامية) is in the sentence.

Dialect Level	كَمِّية اللهجة العامية
	✓ Choose level...
	No dialect (فصحى فقط)
	A bit of dialect (القليل من العامية)
	Mixed (خليط من الفصحى والعامية)
	Mostly dialect (معظمها عامية)
	Not Arabic (لغة أخرى أو رموز)
	Choose level... ▼
	Choose level... ▼

Tell us how much dialect (عامية) is in the sentence.

Dialect Level	كمية اللهجة العامية
✓ Choose level...	
No dialect (فصحى فقط)	
A bit of dialect (القليل من العامية)	
Mixed (خليط من الفصحى والعامية)	
Mostly dialect (معظمها عامية)	
Not Arabic (لغة أخرى أو رموز)	
Choose level...	▼
Choose level...	▼

Fleiss'  $\kappa = 0.44$

Tell us how much dialect (عامية) is in the sentence.

Dialect Level	كمية اللهجة العامية
<input type="checkbox"/>	✓ Choose level...
<input type="checkbox"/>	No dialect (فصحى فقط)
<input type="checkbox"/>	A bit of dialect (القليل من العامية)
<input type="checkbox"/>	Mixed (خليط من الفصحى والعامية)
<input type="checkbox"/>	Mostly dialect (معظمها عامية)
<input type="checkbox"/>	Not Arabic (لغة أخرى أو رموز)
<input type="checkbox"/>	Choose level... ▼
<input type="checkbox"/>	Choose level... ▼

Fleiss'  $\kappa = 0.44$

Embrace annotators disagreement!

# Sentence with two valid pronunciations

نبتدى بقي الشغل الصح فى تطوير المدارس وتوفير  
المراقبين عليها

We start with the right task of de-  
veloping schools and providing ob-  
servers over them

# Sentence with two valid pronunciations

نبتدى بقي الشغل الصح فى تطوير المدارس وتوفير  
المراقبين عليها

We start with the right task of de-  
veloping schools and providing ob-  
servers over them

    
Little Little Most

## ♻️♻️♻️ From AOC to AOC-ALDi ♻️♻️♻️

- 1 Labels into numeric values
- 2 Algebraic Mean
- 3 Regression-head on top of MarBERT

e.g.,  $\text{ALDi}(\text{MSA}, \text{MSA}, \text{Little}) = \overline{(0, 0, \frac{1}{3})} = \frac{1}{9} \approx 0.11$

🤝 Krippendorff's  $\alpha$  (interval) = 0.63

🎯 Sentence-ALDi's  $\text{RMSE}(\text{AOC-ALDi}_{\text{test}}) = 0.18$

# Reflections on the AOC ratings

- ⚠ Annotators randomly assigned to sentences.
- ⚠ Underspecified guidelines.

## 2) NADI 2024 Dataset

IFF an annotator labels the tweet as written in one of their country-level dialects.

Please evaluate the Level of Dialectness of each tweet as:

- L0** Sound MSA
- L1** Formal Colloquial or Colloquial-influenced MSA
- L2** Natural/Ordinary Colloquial
- L3** Informal (or Vulgar) Colloquial

Note: The levels and their descriptions were provided in Arabic.

Country	N valid	Krip. $\alpha$
Algeria	333	0.66
Morocco	230	0.74
Tunisia	189	0.75
Egypt	353	0.82
Sudan	393	0.66
Palestine	375	0.68
Syria	475	0.79
Iraq	271	0.73
Yemen	454	0.50

✓ Improved alpha scores than AOC-ALDi.

# Reflections

**ALDi: Divergence** from Modern Standard Arabic (MSA).

## 1 Differences in ALDi Ratings across Countries

e.g., بسمتك يا زين تسوي الف بسمه

(O' Zain, your smile is worth thousand smiles)

-  L1 - Formal Colloquial
-  L2 - Natural/Ordinary Colloquial

Country-level ALDi scores VS Single-aggregated ALDi score?

# Reflections 🤔

## ALDi: Divergence from Standard Arabic.

- 2 Perception of Standard Arabic might not be linguistically accurate.
  - Two words for Wine (نخمر, نحرمة)
  - Both are grammatical in Standard Arabic.
  - نحرمة is perceived as Dialectal in Egypt.

a.keleg@sms.ed.ac.uk

## Summary

- 1 Multi-label setup is more realistic for ADI.
  - ⚠️ Not solved yet.
- 2 Arabic sentences have different levels of dialectness (ALDi) i.e., not just MSA or a dialect.
  - 🤖 Automatically estimated by Sentence-ALDi model.
  - 🌱 aids Content Moderation, and Analysis of different styles.
    - Demo on 😊: [huggingface.co/spaces/AMR-KELEG/ALDi](https://huggingface.co/spaces/AMR-KELEG/ALDi)

# 1) Studying Intraspeaker Variation

# 1) Studying Intraspeaker Variation

# Finding (2) - Dialect Identification Datasets

## **i** Labels (Macro-regional):

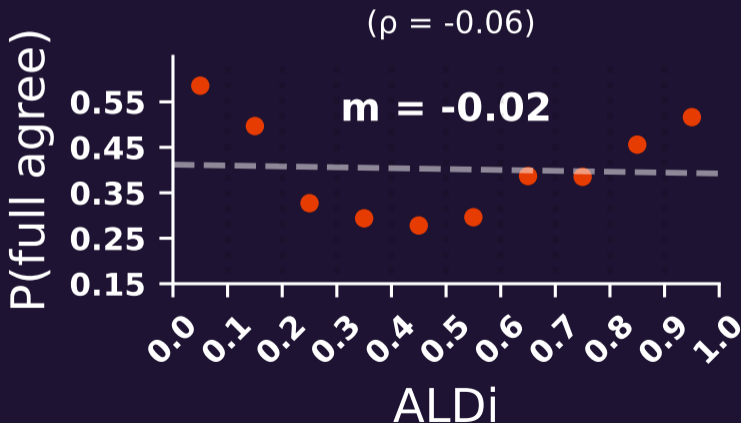

Modern Standard Arabic (MSA), Maghreb, Egypt, Levant, Gulf

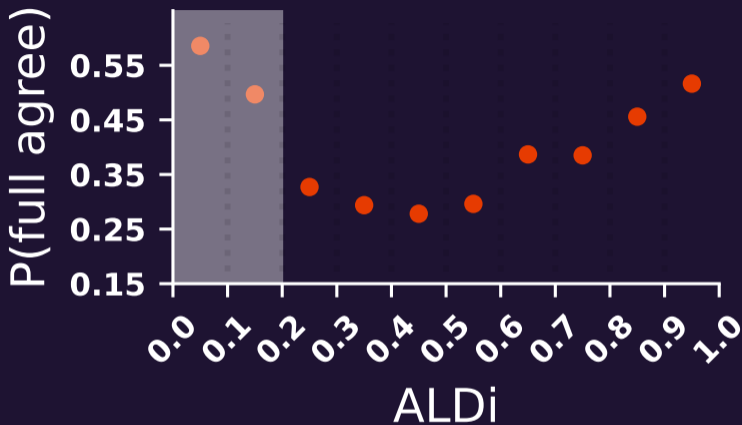

# Finding (2) - Dialect Identification Datasets

## i Labels (Macro-regional):

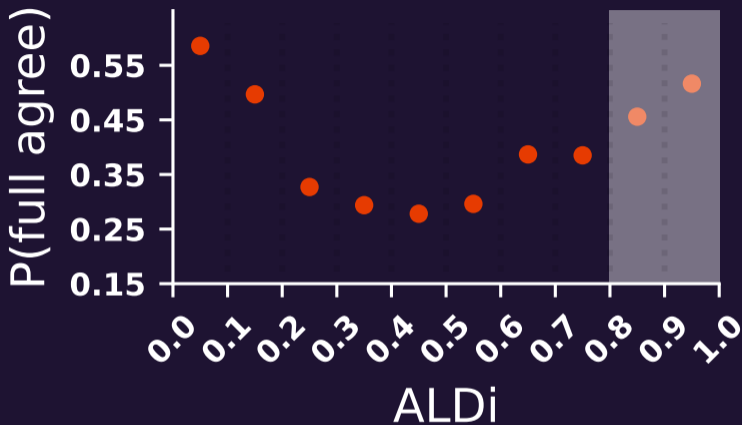

Modern Standard Arabic (MSA), Maghreb, Egypt, Levant, Gulf

 **MSA samples**

 DA samples with **multiple distinctive cues** of a dialect

 **Less cues** - harder to determine the dialect.
